SUMMARY

Experienced Odoo Developer at Telenoc Org, specializing in custom module development, system migrations, and seamless Odoo.sh deployments. I excel at collaborating with teams to deliver efficient business solutions and optimize workflows. Passionate about leveraging technology to drive results and committed to continuous professional growth.

PROFESSIONAL EXPERIENCE

Jr. Odoo Developer - Telenoc Organization

March 2025 – Current

- Assisted in continuous integration and continuous deployment (CI/CD) pipelines, including automated testing and Odoo.sh cloud deployments.
- Monitored server performance, analyzed logs, and performed root cause analysis to proactively identify and resolve system issues.
- Developed and maintained RESTful API integrations between Odoo and third-party platforms, ensuring secure and efficient data exchange.
- Authored and maintained technical documentation, including module specifications, API contracts, and deployment guides.
- Conducted code reviews and static code analysis to enforce coding standards, optimize performance, and minimize technical debt.
- Provided Tier 2/3 technical support, troubleshooting complex user issues, and delivering hotfixes or patches as needed.
- Implemented data migration scripts and ETL processes for seamless onboarding of legacy data into Odoo environments.
- Utilized advanced SQL queries and ORM methods for data extraction, transformation, and reporting.
- Participated in peer knowledge-sharing sessions, technical workshops, and ongoing professional development initiatives.
- Ensured compliance with security best practices, including access control, data privacy, and secure coding standards

Odoo Developer Trainee- Netelligence Business Systems LLC

August 2024 – January 2025

- Collaborated with senior developers on enterprise-grade Odoo projects, including Bake Al Arab, driving scalable and efficient business solutions.
- Hands-on experience in end-to-end Odoo module development and customization, ensuring seamless system integration.
- Developed and customized Odoo modules using Python, JavaScript, and XML, optimizing workflow automation and business process efficiency.
- Designed and tailored dynamic financial reports, invoices, and XLSX reports, aligning with business intelligence needs.
- Executed data migration strategies across Odoo versions using SQL, maintaining data integrity, consistency, and performance.
- Migrated and optimized multiple legacy Odoo modules, enhancing scalability, maintainability, and system compatibility.

- Hands-on experience in full-stack web development using the Django and flask framework, delivering scalable and high-performance applications.
- Developed feature-rich web applications with Python, HTML, CSS, Bootstrap, and JavaScript, ensuring seamless user experiences.
- Strengthened expertise in backend architecture, database optimization, and frontend responsiveness for highly efficient web solutions.

PROJECTS

HCM Employee Self Service (ESS)

- Developed and customized Odoo modules for employee self-service, enabling digital management of leave, attendance, and document workflows.
- Automated HR processes by implementing Python-based business logic and custom server actions.
- Designed and enhanced user interfaces using XML and QWeb for a seamless employee experience.
- Collaborated with cross-functional teams to gather requirements and deliver scalable Odoo solutions.
- Conducted unit testing and debugging to ensure robust, error-free module deployment.

Attendance Location Validator

- Engineered geo-fencing and location validation features using Odoo and map-based integrations.
- Implemented advanced check-in/check-out logic, supporting both on-site and remote work scenarios.
- Leveraged Leaflet and Odoo APIs to provide interactive map views and location-based attendance tracking.
- Optimized data models and workflows for high-accuracy attendance reporting.
- Collaborated with QA to test edge cases and ensure compliance with company policies.

Almehwar (Business Solution)

- Developed custom PDF report templates and automated report generation using QWeb and Odoo Studio.
- Customized approval flows and business logic to align with unique client requirements.
- Built and maintained custom modules and apps, leveraging Odoo Studio and Odoo.sh for rapid prototyping.
- Integrated Odoo with external systems for seamless data exchange and process automation.
- Documented technical specifications and provided user training for new features.

Mazia (Property & Villa Portal)

- Designed and implemented multi-channel survey forms for capturing investment interests using Odoo's form builder.
- Automated CRM lead generation from survey submissions, streamlining sales and marketing workflows.
- Developed QR code generation features for channel-specific campaign tracking.
- Built custom modules for survey management and lead analytics, enhancing business intelligence.
- Ensured data integrity and security across all user submissions and CRM records.

Scrap Customization Module

- Developed a custom Odoo module (sdm_scrap_customization) to optimize stock scrap processes, introducing multi-product scrap workflows, approval automation, and advanced reporting.
- Extended Odoo models (stock.scrap, purchase.order.line) with additional fields and validation logic to support enhanced functionality.
- Implemented dynamic financial reporting with PDF and Excel exports using QWeb templates and XLSX generation.
- Designed user-friendly wizards for generating scrap reports, with filtering capabilities by date, product groups, and locations.

SKILLS

- | | | | | |
|--------------|--------|-------|--------------|-------------|
| • Python | • SQL | • XML | • AWS | • Odoo |
| • JavaScript | • HTML | • Git | • Postgresql | • Bootstrap |
